1 Introduction

1.1 Novade, leading provider of field management software

Novade is a leading provider of field management software, enhancing quality, safety, and productivity. Our flagship product, Novade Enterprise, is trusted by the world's largest companies in the building, infrastructure and engineering industry, to track performance and manage compliance in the field. The solution is deployed over 10,000 sites globally and trusted by more than 150,000 users in 25 countries.

With Novade Enterprise, site processes such as quality controls, safety inspections or progress monitoring are digitalised and automated using mobile devices. The data captured provides insights to streamline operations and drive results. Opting for Novade Enterprise grants you:

- Unified Application Access: Capture and synchronize data from the web or any mobile device, in online and off-line mode.
- Custom-Built Modules: Our modules for Quality, Safety-HSE and Site Diary are meticulously crafted to digitize field processes and match the way your work.
- Common Digital Platform: A versatile platform designed to configure the system and administer with ease form templates, personnel, assets and technical documentation.
- Advanced Analytics: Drive field performance and compliance further with Novade Insight, our powerful analytics extension.

Developed on leading edge technology, Novade Enterprise assures security and reliability, and enables integration with your existing enterprise systems. To ensure a swift adoption and maximize your return on investment, Novade offers comprehensive support including system setup, deployment management, training, system integration, and premium customer support.

1.2 PT Kaltim Parna Industri requirements:

PT Kaltim Parna Industri (KPI) wants to digitize their Work Permit System and Action Item and Task Monitoring QHSE and Incident Report Monitoring System. Novade Safety-HSE is fully customizable to match KPI's requirement and gives easy access to your data on cloud base platform.

1.3 Our offering

Our pricing reflects the high standards of technology, customer service, and the continuous innovation that Novade delivers.

Pricing Summary	SGD	
Setup & Configuration – 1 project – Safety-HSE module		
Yearly subscription – 1 project – Safety-HSE module – unlimited users		
Total for one year after discount		
<i>Optional:</i> premium support, yearly subscription		
<i>Optional:</i> Novade insight, yearly subscription		

The subsequent sections provide a comprehensive overview of the value and support included in our pricing.

2 Safety-HSE module

2.1 Overview

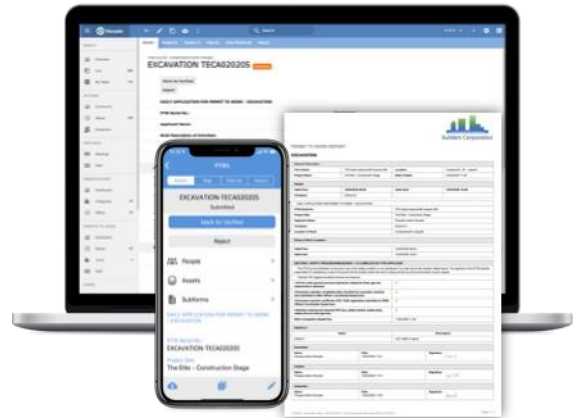

The Safety-HSE module is used to manage safety procedures in the field such as Permits To Work (PTWs), Observations, Incidents, Toolbox Meetings, Inspections, and/or Non Conformity Reports (NCRs). Paper forms are replaced by an easy-to-use mobile application. All key stakeholders are engaged in key processes:

- Field operators or sub-contractors can submit data from mobile devices and are notified when actions or the validation of actions is required
- Safety managers can conduct inspections and approve compliance requests instantly. Corrective actions are also easy to check and monitor
- Site managers can monitor the status of all Permits to Work, Nonconformities, observations, near misses, incidents, audits and compliance registers in real time

Reports and forms are archived in a secure environment, accessible any time for audits.

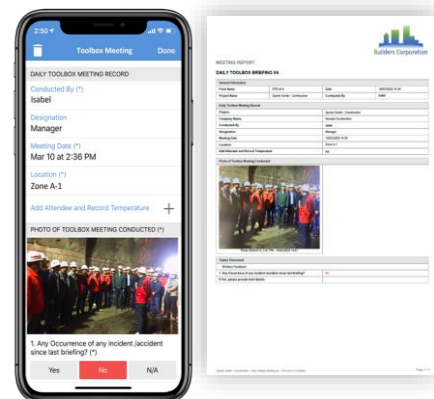

2.2 Permits to Work

- Enforce your standards and improve safety on the job site with first class Permit to Work software
- Create your own electronic Permit to Work templates such as hot work, lifting, work at height etc.
- Conduct risk assessments & ensure proper measures are in place before commencing work
- Identify workers, view their toolbox meeting attendance and qualifications and ensure they all have valid credentials
- Identify equipment, view their certificates and ensure they can operate safely
- Automate clash detection and flag out potential conflicting work in close proximity prior to PTW approval

2.3 Safety Toolbox Meetings

- Easily manage safety toolbox talks with predefined health and safety briefing templates
- Track workers' attendance for each meeting
- Encourage the teams to apply workplace safety and health in construction sites
- Select and record toolbox topics covered each day
- Review all meetings conducted
- Easily generate safety toolbox meetings PDFs.

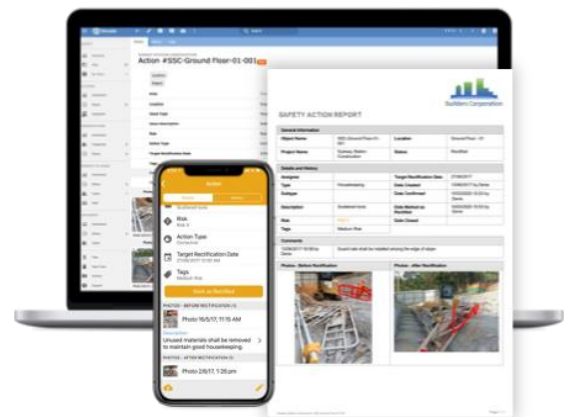

2.4 Safety Observations

- Allow workers in the field to report hazard observations from their mobile devices
- Observe safe working practices and provide positive reinforcement
- Easily create safety observation reports
- Encourage sharing of best safety practices across projects; make safety conversations second nature
- Help find unsafe acts and conditions; follow up with corrective or preventive actions.
- Identify trends to reduce job site risks and safeguard workers' health and safety

2.5 Safety Inspections

- Lodge non-conformities with the cloud-based construction safety software during inspections
- Select standard descriptions;
- take and annotate pictures
- Assign corrective actions on the spot with starting date, completion date, and level of severity
- Create your own construction safety site inspection form templates
- Generate safety reports automatically
- Option to customise your site inspection report to match your requirements

2.6 Incident Reports & Near-Misses

- Customise digital forms to match your incident, accident or near miss reports
- Input information from mobile app: hazards, hazard sources, root causes, etc.
- Gather facts quickly and efficiently to facilitate investigations and prevent future claims
- Formulate and monitor corrective and preventive actions to reduce incidents on the job site
- Conduct analysis: assess frequency, most common sources, and correlations

2.7 Effectively Manage Safety Records for Equipment and Machinery

- Easily create data for equipment and machinery.
- Manage equipment and machinery certifications.
- Ensure that equipment and machinery operate in safe and reliable conditions.
- Barcodes and NFC Tags capabilities.

2.8 Manage Personnel Safety Records

- Streamline employees' induction processes
- Easily create accounts for new employees
- Manage safety qualifications
- Manage work permits
- Integrate barcodes and NFC Tag capabilities for ease of use

2.9 Achieve Tangible Business Benefits

- Enforce HSE compliance: Rule-based system and real time monitoring ensures rigorous enforcement and control on key processes
- Reduce HSE management costs: Reduce compliance administration costs by 80% and say goodbye to thousands of paper forms
- Build & sustain your safety culture: Gather feedback, achieve your KPIs, and prevent issues before they occur

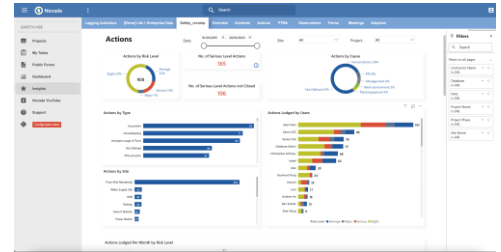

Novade Safety-HSE is a formidable platform to improve safety project after project. By capturing information day after day, you can analyse data, identify trends, draw correlations and ultimately improve safety on projects.

3 Powerful Analytics with Novade Insights (Optional)

Novade Insights is an off-the-shelf analytics and dashboard extension that intelligently interprets your data. By harnessing clean, engineered data, you can transform field data into immediate insights for decision-makers.

3.1 Get Started Straight Away with Standard Dashboards

- Powered by Power BI, no setup required.
- Dynamic filtering of data and export to PDF, Excel, or PNG.
- Use mission-critical leading indicators to make predictions, diagnose issues, and take action.

3.2 Easily Customise your Reporting to Match Your Company Metrics

- Quickly create tailored dashboards with simple Drag & Drop of your favourite visuals from our dashboards library
- Store your dashboards in our Novade Power BI Embedded workspace and share them with your team.

3.3 Easily Query Your Data and Send It to Your Own Data Warehouse

- Connect to our Delta Lake in just a few clicks with Delta Sharing by Databricks
- No development needed – Delta Sharing is integrated with Power BI, Tableau, and all main BI tools.
- Query our Engineered Data into your dashboards, Common Data Environment, or Enterprise system – our Insights tables are optimized for all these use cases.

3.4 Drive Performance and Compliance with Data

Novade Insights enables clients to optimize site controls and leverage site data to predict trends and make faster, smarter decisions. Here is a non-exhaustive list of potential use cases:

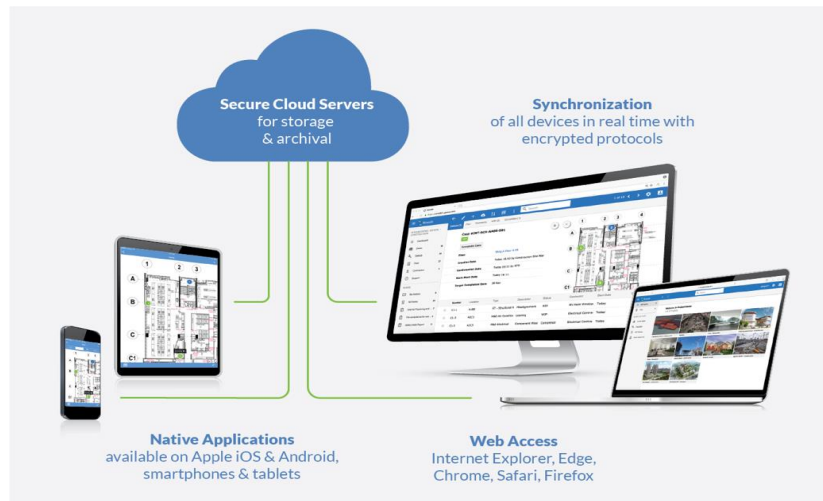

- Measure and analyse field performance to improve efficiency.
- Predict high-risk activities using your safety leading indicators to prevent workplace injuries.
- Benchmark safety by site, project, company, subcontractor, or against national standards.
- Identify top performers for talent and supplier management.
- Identify patterns and trends to execute preventive measures.
- Define and track operational metrics to optimize site processes.
- Track digital transformation adoption to manage successful change.
- Benchmark projects and suppliers to apply best practices.

4 Common Digital platform

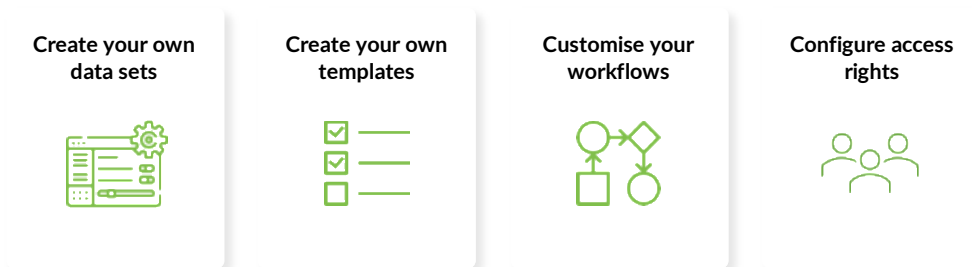

4.1 System Architecture

All modules are built on a common platform enabling access and synchronization from all devices, including iPhones, iPads, Android phones and Android Tablets. Data is stored in secure cloud servers. The applications work in offline mode – the data is automatically synched when an internet connection is available.

4.2 Full Configuration & Customisation Capabilities

All modules allow full configuration & customisation capabilities, so that you can digitise all your processes just the way you want

System administrators can easily manage the configuration and define access rights for each user, by type and project.

4.3 Manage Data and Resources in the Field

- **Project Organization**: project setup and data visualization across zones, levels, areas, or units for easy navigation and management.
- **Technical Documentation**: upload and share PDFs, drawings and 3D models, with version management and annotation features.
- **People Management**: Quickly add and organize entire project teams and enhance on-site access to employee data via QR codes. Manage and monitor trade qualifications and expiration dates effectively.
- **Asset Management**: Maintain a complete inventory of assets ranging from fixed equipment to machinery and ensure instant field access using QR codes. Locate mobile assets on maps with GPS tagging or real-time GPS location. Proactively maintain and inspect equipment.

4.4 Complex Processes & Workflows Made Easy

Our digital platform includes the most powerful forms engine in the market. With significant out-of-the-box configuration capability plus easy-to-deploy custom scripts, you can achieve near infinite possibilities and match the most extreme and complex site processes. Quick Highlights of Novade Digital Forms:

- **Intuitive Form Builder:** Effortlessly create or import templates and deploy instantly on any mobile device.
- **Add any type of content:** Incorporate various elements like checkboxes, combo boxes, button questions, dropdown lists, date & time, etc..
- **Manage any type of workflow:** From the simplest to the most intricate processed, with up to 200 steps including conditional workflows.
- **Integrate field data:** Easily link documentation, drawings, personnel, and assets, as well as external data connected via APIs or connectors.
- **Automate and Communicate:** Benefit from built-in calculations, real-time notifications, and customizable reminders to keep processes on track.
- **Visualize your Data:** Turn your data into actionable insights with tailored dashboards and exports to PDF, Excel, or Power BI.

With Novade digital forms, you're equipped to redefine efficiency and lay the groundwork for a range of innovations in your site management practices.

4.5 Tailored Dashboards on Demand

"Dashboard Designer" is an integral feature of the digital platform, revolutionizes the way users interact with data. This tool empowers teams to craft bespoke dashboards and generate reports that encapsulate the dynamics of their projects.

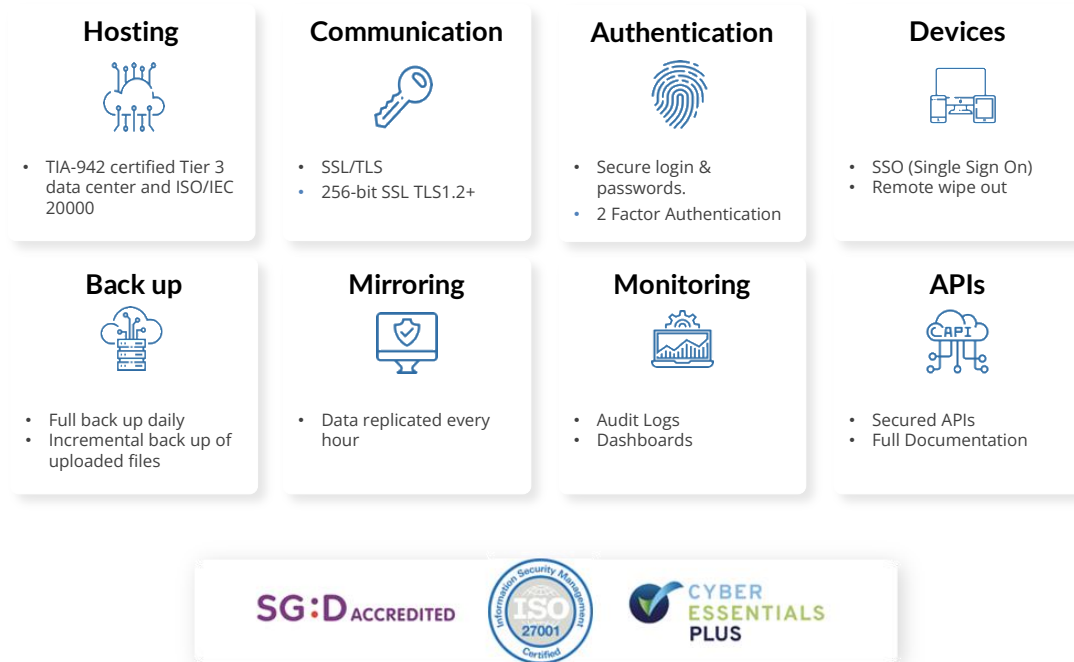

- **Rapid Customization:** Assemble tailored dashboards in minutes, reflecting the unique metrics that matter to your projects.
- **Live Data Reporting:** Gain insights with real-time data analytics from multiple projects and form templates.
- **Mobile-Optimized:** Stay informed on-the-go with dashboards designed for mobile platforms, ensuring access anytime, anywhere.
- **Interactive Data Editing:** Update and refine data directly from your dashboard for a seamless experience.
- **Seamless Export Options:** Share and present your findings effortlessly with options to export data into PDF and Excel formats.

With Novade Enterprise, dashboard creation is no longer a complex task but a straightforward, user-friendly experience that places comprehensive data control at your fingertips.

4.6 Secure and Reliable Enterprise Grade Technology

Novade is ISO 27001 certified and committed to safeguard information security and provide the highest level of data protection. Novade Enterprise includes the following key features:

4.7 Integration Capabilities

Novade Enterprise is engineered to capture, visualize, share, and analyse field data. Recognizing the importance of integration with other systems - such as project management, asset management, HR or financials - is crucial to optimize field operations. We offer three mechanisms for integrate Novade Enterprise with other systems:

- **Manual:** Utilize Excel files for data import and export. This method is recommended at the start of the engagement.
- **APIs:** Push or query data from our system as needed. This powerful and versatile option requires custom code development and ongoing maintenance. The development can be undertaken by clients, partners, or the Novade team.
- **Connectors:** We provide predefined connectors with established solutions from companies like Autodesk, Procore or Oracle. These connectors are available through subscription extensions and do not require any custom code development or maintenance.

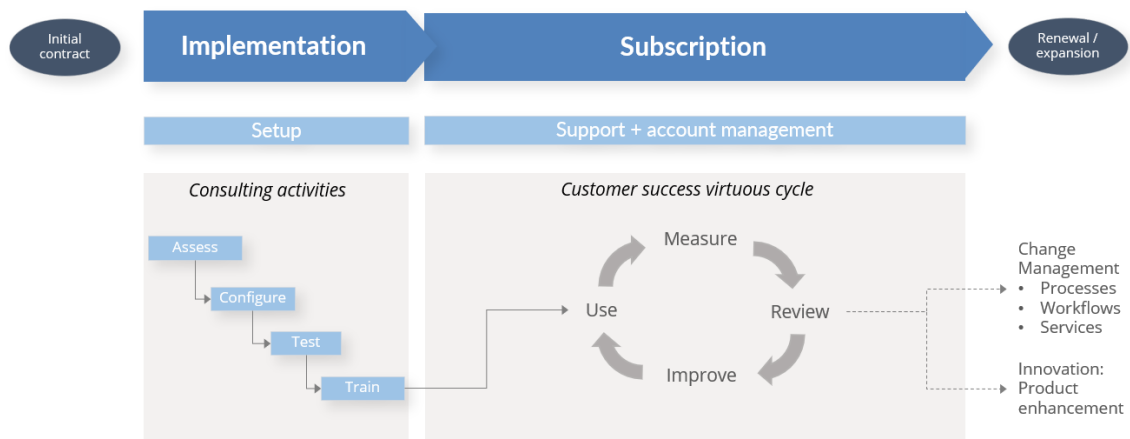

4.8 No Additional Investment Required

- **No additional hardware Investment:** data is hosted in the cloud
- **No additional software required:** online services can be accessed with standard browsers
- **Minimum requirements on mobile devices;** inspections can be done on mobile phones.
- **Inspection data can be synchronized on Wi-Fi networks;** While having data plans for mobile devices is beneficial, it is not essential. Data compression techniques are employed to minimize data usage.

5 Customer Journey

5.1 Digital Transformation from the Ground Up

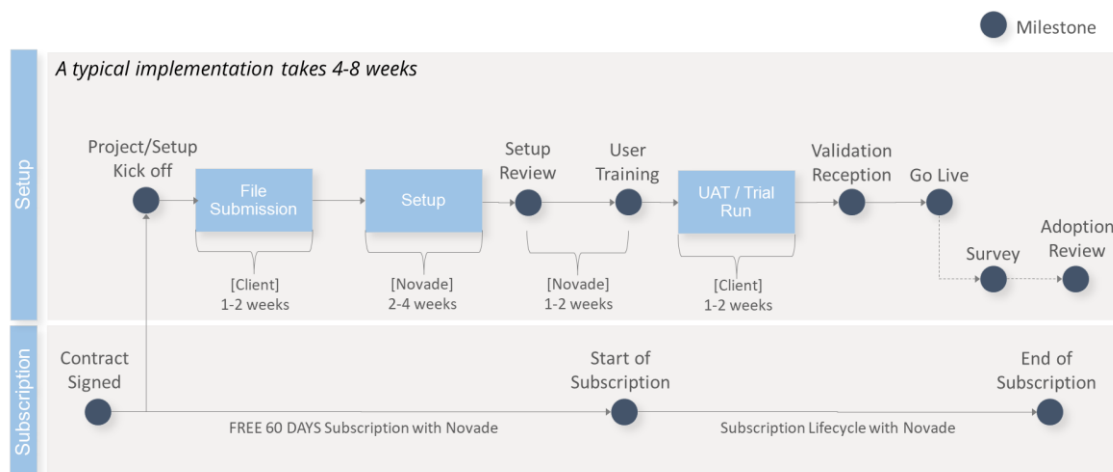

At Novade, digital transformation is initiated from the core of your operations - the field. We recognize that an intuitive and empowering customer journey, backed by exceptional support, is crucial to a successful digital transformation. Our service team, with decades of combined experience, draws upon best practices from various industries and regions to offer superior support and guidance. This dedication is mirrored in our impressive support satisfaction score, consistently exceeding 97%. The diagram below illustrates how Novade proactively supports clients throughout every phase the partnership.

5.2 Implementation: in the Field with You Every Step of the Way

From setup to go-live, Novade offers:

- **Expert Project Management & Consulting:** Benefit from a dedicated Digital Consultant and team focused on effective and timely deployment.
- **Comprehensive System Setup:** we will guide you thru initial project data imports, user account creation, asset creation and the establishment of project spatial hierarchies, ensuring the configuration meets project objectives prior to go-live.
- **Customized Form Templates & Workflows:** Each is configured to meet your specific needs, with revisions to ensure optimal function and flow.
- **In-depth Training:** General user training is conducted online via Microsoft Teams. On-site training is available as appropriate. Additionally, Novade Academy offers a suite of training classes accessible online 24/7.

5.3 Continuous and Adaptive Support

- Standard Support: granted for any subscription, available during standard working hours. Answering any questions and clarifications requiring no system modification nor custom development
- Premium Support: additional value delivered by dedicated consultants providing ongoing process optimization, quarterly reviews, escalated support services and consulting work to optimise your return on investment.
